SEASOL

Seasol[®]

FOR LUSH GREEN LAWNS!

Seasol for Lush Green Lawns feeds and revitalises your lawn, but also conditions the soil, so it takes care of all types of lawn above and below the ground. It is a liquid fertiliser and health treatment that combines **Seasol** the seaweed solution, a specially formulated nutrient mix (N:P:K 7:0.8:5.4), trace elements, concentrated liquid composts and a wetting agent.

HOW IT WORKS:

1. Feeds your lawn

The combination of **Seasol** and essential nutrients promotes vigorous root and foliage growth. A lush healthy lawn is more able to cope with stress and compete with unwanted weeds. Simply click it onto the hose and away you go! The 2 Litre container treats 100 sqm of lawn in just 10 minutes.

2. Ensures water penetration

Seasol for Lush Green Lawns has the added bonus of a wetting agent to make sure that valuable water and nutrients can penetrate the root zone.

3. Keeps soil conditioned

Liquid composts help to nourish and improve the soil, reduce nutrient leaching and stimulate beneficial soil microbes, which are vital for plant and soil health.

4. Quick greening

Seasol for Lush Green Lawns stimulates strong healthy leaf growth and enhances foliage colour. It's a fast-acting soluble formulation, so you'll have a lush, green lawn in no time.

5. Protect lawn from stress

The added **Seasol** helps to promote strong, vigorous roots and a healthier lawn that is more resistant to stress from heat, drought, frost and foot traffic.
