**GROW AND MAINTAIN A LUSH GREEN LAWN WITH TUI'S 4 STEPS OF LAWN CARE**

## TUI SUPERSTRIKE® LAWN SEED

**All Tui Superstrike® lawn seed varieties feature a unique treatment which encourages fast establishment of lawn seed, so you can see results in as little as seven days under ideal growing conditions. This industry leading treatment also protects the seed from common fungal diseases during establishment and reduces bird theft.**

**Choose the right Tui Superstrike® Lawn Seed for your backyard from the following varieties:**

### **Tui Superstrike® Easycare Lawn Seed**

Creates a fast establishing but slow growing lawn for less mowing and maintenance. This Easycare blend produces a lush, green, medium blade lawn, suited to medium-high use areas.

### **Tui Superstrike® Hardwearing Lawn Seed**

Ideal for those whose lifestyle requires a hardwearing lawn to withstand the everyday wear and tear of children, pets and cars. Tui's Hardwearing blend produces a thick blade lawn suited to backyards, playgrounds, driveways and other high use areas.

### **Tui Superstrike® Hot & Dry Lawn Seed**

This blend encourages deep penetrating roots, perfect for dry conditions or sandy soil. Our Hot & Dry blend produces a medium blade, drought tolerant lawn ideal for high use areas.

### **Tui Superstrike® Shady Places Lawn Seed**

Perfect for shady spots, such as under trees. Tui's Shady Places blend produces a fine-medium blade lawn that will thrive in less sunlight and require less mowing.

### **Tui Superstrike® Superfine Lawn Seed**

Tui's Superfine blend creates a fast establishing, slow growing lawn for less mowing. This Superfine blend produces a fine textured ornamental lawn.

# TUI'S 4 STEPS OF LAWN CARE

01  
PREPARE

02  
PLANT

03  
NOURISH

04  
PROTECT

There is nothing quite like wandering barefoot across your backyard savouring the feeling of grass between your toes. A lush, green lawn really sets off a house and is the pride and joy of any keen gardener. Knowledge and quality products are the key to ensuring a beautiful, healthy lawn.

## PREPARE

Spring and autumn are the best times to sow a lawn. To ensure you have a successful lawn the soil needs to be in the best possible condition to give lawn seed the best chance of germination. When starting a new lawn from scratch, spray the area to kill any existing grass and weeds. When patching your lawn, spray weeds and any grass you want to remove. Clear away weeds and grass once it has browned off. Apply a 25-30mm layer of **Tui Lawn Preparation Mix** to the area to provide lawn seed with a base of essential nutrients and fertiliser. Create a level and compact area for your lawn by raking, rolling and filling in where needed. Water before sowing lawn seed.

**Tui Tip:** If your soil is too acidic (a simple pH test will reveal this), add Tui Lime or Tui Dolomite Lime to neutralise and improve soil condition.

## PLANT

Choose a fast growing seed such as **Tui Superstrike Lawn Seed** to start seeing seedlings in as little as seven days. Sow seed on a fine day at the rate set out on the packaging. Scatter seed in an east to west direction then a north to south direction to ensure an even spread. Rake in lightly to ensure seed is completely covered. Water lightly and keep moist on a daily basis during the germination period. Try to avoid making puddles with the water as this can move the lawn seed around. Don't be tempted to mow your new lawn straight away – wait until it has grown to at least 5cm so the root system has had time to develop. When mowing your new lawn use sharp blades and set your mower to the highest level, gradually lowering the level over the next three months until you reach the optimum height of 2.5cm–3cm.

## NOURISH

Your lush new lawn will need to be cared for throughout the year. A thick, healthy lawn stops broadleaf and other weeds from becoming established. After you have mown it three or four times, apply **Tui Lawn Fertiliser** or **Scotts Lawn Builder** to encourage lush, thick, green growth in your lawn. Once established, fertilise your lawn in spring, early summer and autumn. Well watered, well nourished lawns will have a better chance of keeping weeds, pest insects and diseases at bay.

**Tui Tip:** Apply Seasol for Lawns to feed and revitalise your lawn and enhance root development.

## PROTECT

The weather, weeds, pest insects and diseases can all impact on the success of your lawn. The **Tui Plant Protection range** will help you put a stop to any issues that arise. An application of **Tui Prickle Eliminator for Lawns** in spring will give you a prickle free lawn in summer. If hydrocotyle weed is an issue use **Tui Hydrocotyle Weed Eliminator for Lawns**.
